

# Vollkraft Engineers & Consultants Pvt. Ltd.

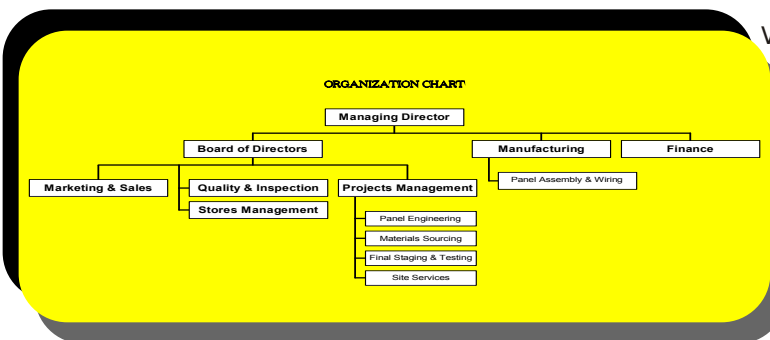

## Corporate Overview...

Vollkraft Engineers & Consultants Pvt. Ltd. is a company specializing in industrial automation solutions and electrical control panels. With more than fifteen years of experience in a variety of process controls and automation systems, Vollkraft offers turnkey solutions to industries.

Vollkraft was established in 1991 as a private limited company. Since then, it has grown steadily, gaining recognition and acceptance in the Indian market as a reliable automation solutions provider and a supplier of quality electrical control panels. Vollkraft has a large installed base of custom-built switchboards, Motor and Power Control Centres, Power Distribution Boards, as well as Control Desks, Mimic Panels, and Instrumentation Panels.

Vollkraft is an authorized system house of GE Fanuc in India. With a strong, open, and layered product platform from GE Fanuc, Vollkraft has successfully completed numerous control system projects based on PLCs and HMI/SCADA systems.

Yaskawa AC Drives from L&T's Control & Automation Business Unit and Energy Management Systems from Conzerv also form an integral part of the product basket that Vollkraft has to offer to its customers.

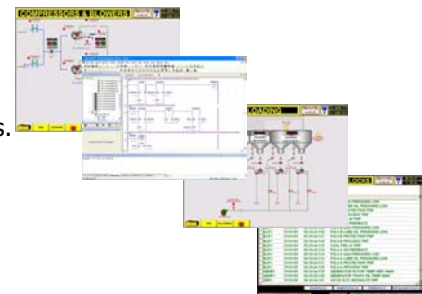

Vollkraft is led by a team of technocrats who have sound product knowledge and domain expertise in the areas of electrical and automation controls. S. N. Maitra, the Managing Director of Vollkraft is an electrical engineer with over 30 years of experience in control systems business. A growing team of dedicated engineers, with experience in project management, application development and site services, adds to the strengths of Vollkraft. True to the essence of its name, vigour is the core component of every solution that Vollkraft provides.

## Mission Statement...

*"To serve our clients with industrial automation solutions of unsurpassable quality, backed by strong service, enduring support, and uncompromising emphasis on customer satisfaction."*

## Our Business...

- Turnkey project implementation involving design, engineering, supply, site services and commissioning of PLC Systems, HMI/SCADA and automation software, AC & DC drives, instrumentation, controllers, computers, control panels, and control desks.
- PLC upgrades and retrofit projects.
- Supply and installation of custom-built switchboards, MCCs, PCCs.
- On-site training services on GE Fanuc Automation Equipments and Software products.

**Control Solutions with Vigour**

## Our Product Offerings...

### Manufactured Products:

- Electrical control panels – MCCs, PCCs, PDBs, Control Desks, Junction Boxes, and Local PB Stations
- PLC panels
- Instrumentation panels
- Mimic panels
- Other custom-built panels

### Represented Products:

Automation Equipment from GE Fanuc Automation

- Visualization Products
- Programmable Controllers
- Remote I/O

Drives from Larsen & Toubro Limited

- Yaskawa Generation 7 AC Drives
- LnTOR-D7 DC Drives

Intelligent Production Solutions from GE Fanuc Automation

- Real-Time Information Portal
  - Plant Performance & Execution
  - Integrated Quality
  - Asset Management
  - Plant Data Repository
  - HMI/SCADA
  - Programming and Control

Energy Management Systems from Conserv

## Our Value Proposition...

Vollkraft builds custom solutions on automation platforms to improve business performance

Vollkraft ensures a superior value to its customers by utilizing in-house technical expertise and domain knowledge

## Our Experience...

### Power

- Coal Handling Systems
- Ash Handling Systems
- Burner Management Systems
- Sequence of Events Recorders
- Boiler Interlocks
- Water Treatment

### Metals

- Furnaces
- Steel Making / Processing
- Sponge Iron Plants

### Others

- Cement Mills
- Fume Treatment Plants
- Machine Tools
- Material Handling OEMs
